

# COURSE PROJECT REPORT

## 1. PROJECT TEAM DETAILS

| ROLL NO | Full Name | Mail ID | Phone No. | Signature |
|---------|-----------|---------|-----------|-----------|
|         |           |         |           |           |
|         |           |         |           |           |
|         |           |         |           |           |
|         |           |         |           |           |

## 2. PROJECT TITLE

The project title should describe the project in **one sentence and preferably not more than 15 words**.

## 3. PROJECT DOMAIN

Mention the **field of science/technology** to which the project belongs.

**Example:** Artificial Intelligence, Machine Learning, Computer Vision, IoT, Robotics, Healthcare Technology, etc.

## 4. PROJECT ABSTRACT

Provide a **single concise paragraph** describing:

- Problem addressed
- Proposed solution
- Major technology/components
- Key innovation
- Main advantage
- Application

## 5. LITERATURE REVIEW / EXISTING TECHNOLOGY

Describe the existing technologies, systems, methods, or applications related to the project.

Mention:

- Existing solutions available in the field
- Limitations of existing solutions
- Relevant research papers/patents/applications
- How the proposed project addresses these limitations

## 6. PROJECT OBJECTIVES

Mention the **purpose and objectives of developing the project**.

Describe the reasons for developing the proposed solution and the expected advantages over existing technology.

## **7. PROJECT SYNOPSIS**

Provide a brief summary of the project.

Mention:

- What the proposed system/device/method is
- Major components or modules
- Technologies required
- How the components/modules are connected or integrated
- Basic working principle of the project

## **8. BRIEF DESCRIPTION OF PROPOSED SYSTEM ARCHITECTURE DIAGRAMS / FLOW CHART FIGURES**

Describe the figures used to explain the project.

- Include the required:
- System architecture
- Block diagram
- Flowchart
- Circuit diagram, if applicable
- Prototype/device diagram, if applicable
- Other technical drawings
- Drawings should use numerical references only, with the meaning of each number explained under “Brief Description of Diagrams / Figures.

**Example:**

**Figure 1** illustrates the basic architecture of the proposed project.

## **9. DETAILED PROJECT DESCRIPTION**

Describe the project in detail.

Include:

- System architecture
- Components/modules
- Working mechanism / Algorithms/methods used
- Software and hardware implementation
- Experimental work carried out
- Validation/testing performed
- Results obtained

## **10. IMPLEMENTATION / WORKING PROCEDURE**

Describe the **actual process of implementing and operating the project**.

Explain the working steps of the proposed system/method/device using a practical example wherever applicable.

## **11. KEY PROJECT FEATURES**

Mention the specific technical features of the project that distinguish it from existing systems.

1. [Feature 1]
2. [Feature 2]
3. [Feature 3]
4. [Feature 4]

## **12. INNOVATION AND TECHNICAL ADVANTAGES**

Highlight the innovative aspects of the project.

Explain:

- What is different from existing technology
- What technical improvement is achieved
- How the improvement is achieved
- Whether the project improves accuracy, efficiency, speed, cost, reliability, etc.

## **13. PRACTICAL / INDUSTRIAL APPLICATION**

Mention the **fields, industries, or applications** where the project can be used.

## **14. REFERENCES**

List the research papers, patents, books, websites, datasets, technical documents, and other sources referred to during the project.
